

RFP Requirement - Supplier Collaboration Platform

1. Procurement Objective

The client seeks a secure cloud-based Supplier Collaboration Platform for procurement, contract workflows, document exchange, analytics, and integration with ERP systems. The solution must support 5,000 internal users and 20,000 external supplier users, with future growth to 50,000 supplier users.

2. Technical Requirements

The platform should provide API-first integration with SAP/Oracle ERP, SSO using SAML/OIDC, scalable multi-tenant architecture, workflow configuration, audit trails, reporting APIs, backup and disaster recovery. Preferred deployment is managed cloud in India region with 99.9% availability.

3. Implementation Requirements

Target go-live is within 20 weeks. Suppliers should provide discovery, design, migration, integration, UAT, training, production rollout, staffing plan, milestones, dependencies, and risk mitigation.

4. Commercial Requirements

Proposal must include implementation cost, first-year subscription/support, optional items, assumptions, taxes, and a three-year total cost view. Commercial clarity and value for money will be evaluated.

5. Security & Compliance

Mandatory expectations include encryption in transit and at rest, role-based access, audit logging, vulnerability management, incident response, privacy controls, periodic security testing, and evidence of recognized security certifications such as ISO 27001 or SOC 2 where available.

6. Support & Supplier Experience

Supplier should describe production support hours, severity-based SLAs, escalation process, customer success model, relevant large enterprise implementations, references, and transition support.

7. Evaluation Method

The buyer will evaluate Technical Capability, Implementation Plan, Commercial Value, Security & Compliance, and Support & Experience. Final ranking will combine criterion scoring with deterministic peer benchmarking and tie-break rules.
